Full service history
One owner from New

Retrofit - Autogrease system for undercarriage rollers.
Retrofit - Hydraulic system for turning wheels on counterweight carrier

You start with a powerful 1100 Series lift crane.
Add a special patented counter-weight design and mast.
You have just increased your lifting capacity from 175% (150 ft boom at minimum radius) to 800% (280 ft boom at maximum radius) at long reaches. Only a small additional investment to the original basic machine.
Yet you retain mobility and flexibility and have substantially increased your maximum boom lengths and lifting capacities.
You can still convert back to the standard 1100 Series lift crane in a short time.
